

Senior Cohousing

A New Model for Active Aging in Community

Senior Cohousing will empower you to be part of an innovative elder culture that approaches looming issues in sustainability and health care in an entirely new way.

Learn about plans for Senior Cohousing in the Western Communities.

For 50 years in Denmark, and now in North America, cohousing has enabled ordinary people to create private homes with the advantages of shared resources and community living. While valuing privacy, people cooperate to heighten their mutual quality of life and to increase their ability to live lightly on the planet. Senior Cohousing creates communities for growth, play, and mindful aging.
